

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Milltrust ASEAN Fund, a sub-fund of Emerging Markets Managed Accounts plc Class A Shares (USD)

Objectives and Investment Policy

The Fund's objective is to achieve long term returns.

The Fund primarily invests in equities listed on exchanges in countries which are members of ASEAN (Association of South East Asian Nations), as well as equities of companies operating in, having exposure to, or deriving part of their revenue from the ASEAN region. The Fund may also invest in or gain exposure to such equities by investing in participatory notes.

The Fund is actively managed by Lion Global Investors Limited (Investment Manager). The Investment Manager, by conducting an analysis of companies and an assessment of overall economic conditions, selects stocks which it believes have the potential for capital appreciation and/or which earn dividend income.

The Fund's portfolio may be exposed to a range of industry sectors including financial, commodities, industrials, property, consumer staples and telecommunications, but may at times have a concentration exposure to one or more of these sectors.

While the Fund seeks to achieve its investment objective by primarily employing a directional strategy of holding a long portfolio of equity securities, the Fund may invest in (i) futures on ASEAN region indices, to short equity indices; (ii) forward currency exchange contracts; and (iii) option contracts (on equities and equity indices) as part of its portfolio management and hedging strategy.

Shares in the Fund may be redeemed daily. Investors are referred to the section entitled "Subscriptions" in the Fund supplement.

Risk and Reward Profile

Narrative explanation of the indicator and its main limitations:

- Historical data may not be a reliable indication for the future
- Risk category shown is not guaranteed and may shift over time
- The lowest category does not mean 'risk free'
Since the Fund has limited performance history, the Risk and Reward Indicator is based on a five year period comprising the actual returns of the Fund and a representative portfolio and a market index for the period prior to launch of the Fund, and resulting in a Risk and Reward indicator of 5. The representative portfolio has an annualised volatility of approximately 12%.
- The Fund does not offer any capital guarantee or protection and your investment is at risk. The value of your investment may fall as well as rise.

The following risks are materially relevant to the fund and are not adequately captured by the indicator:

- Liquidity risk, in extreme market conditions there may be lack of liquidity in the market which may adversely affect the ease of disposal of assets and the price at which the securities held by a Fund can be sold.
- Country risk, countries may be subject to political changes, government regulation, social instability or diplomatic developments which could adversely affect the economies of the relevant countries and thus the value of investments in those countries.
- The Fund may invest in derivatives to hedge risk. Hedging involves special risks including the risk that the use of hedging could result in losses greater than if hedging had not been used.
- Currency risk, where the performance of the Fund may be significantly affected, either positively or negatively, by fluctuations in the relative currency exchange rates.

Charges for this Fund

The charges you pay are used to pay the operating costs of the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge NIL
Exit Charge NIL

The Entry Charge is the maximum that might be taken out of your money before it is invested, and the Exit Charge is the maximum that that might be taken out of your money before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing Charges 2.89%

Charges taken from the Fund under certain specific conditions

Performance fee 15% a year of any returns the Fund achieves above the hurdle rate of the MSCI South East Asia Index.

The **entry** and **exit charges** shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The **ongoing charges** figure is based on expenses for the year ending 31 December 2017. This figure may vary from year to year. It excludes performance fees, but includes transaction fees paid to the custodian and its delegates.

For more information about charges, please see section “Fees and Expenses” of the Fund’s prospectus, available at www.emmaplc.com.

Details of the Company’s up-to-date **remuneration policy**, which describes how remuneration and benefits are calculated and awarded, can be accessed from the following website: www.emmaplc.com. A paper copy of the remuneration policy is also available free of charge upon request to the Company.

Past Performance:

The graph shows annual performance calculated in USD for each full calendar year since the share class has been in issue.

The Fund first issued shares in January 2013.

The past performance shown in the chart takes account of all charges.

Past performance is not a guide to future performance.
