

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Milltrust Keywise China Fund, a sub-fund of Emerging Markets Managed Accounts plc Class C Shares (USD)

Objectives and Investment Policy

The Fund's investment objective is to achieve consistent long term capital appreciation through an investment discipline that places emphasis on the fundamental value of potential investments.

To achieve the Fund's investment objective, the Fund primarily invests in and gains exposure to equities of companies with substantial business interests or portion of their operations in the Greater China Region and which are listed or traded on the stock exchanges of Shanghai, Shenzhen, Hong Kong, Singapore, Taiwan, the United States or such other Regulated Market. The Fund may invest in or gain exposure to such equities by investing directly in the China B-Shares market or, through investing in participation notes issued by holders of a qualified foreign institutional investor licence, gaining exposure to the China A-Shares.

The Greater China Region includes the PRC, Hong Kong, Singapore and Taiwan. The Investment Manager may make investments in entities established outside the Greater China Region provided that the underlying issuers have substantial operations or significant connection with the Greater China Region.

There are no fixed geographical allocation of assets within the Greater China Region or sector weighting in the allocation of assets in the Fund. The Investment Manager does not attempt to follow benchmark indices in determining the geographical or sectoral weighting of the Fund.

The Fund is actively managed by Keywise Capital Management (HK) Limited (Investment Manager). The Investment Manager seeks to select stocks which, when using a bottom-up analysis and company research, it believes are being traded at deep discounts or are undervalued to their intrinsic values.

Shares in the Fund may be redeemed daily. Investors are referred to the section entitled "Subscriptions" in the Fund supplement. Shares are accumulating, so income and other profits will be reinvested.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- Risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'
- Since the Fund has limited performance history, the Risk and Reward Indicator is based on a five year period comprising the actual returns of the Fund and a representative portfolio and a market index for the period prior to launch of the Fund, and resulting in a Risk and Reward indicator of 6. The representative portfolio has an annualised volatility of approximately 17%.
- The Fund does not offer any capital guarantee or protection and your investment is at risk. The value of your investment may fall as well as rise.

The following risks are materially relevant to the fund and are not adequately captured by the indicator:

- Liquidity risk, in extreme market conditions there may be a lack of liquidity in the market which may adversely affect the ease of disposal of assets and the price at which the securities held by a Fund can be sold.
- Country risk, countries may be subject to political changes, government regulation, social instability or diplomatic developments which could adversely affect the economies of the relevant countries and thus the value of investments in those countries.
- The Fund may invest in derivatives to achieve the investment objective of the Fund and for direct investment, hedging and efficient portfolio management purposes.
- Currency risk, where the performance of the Fund may be significantly affected, either positively or negatively, by fluctuations in the relative currency exchange rates.
- A departure or absence of the Investment Manager's key portfolio manager could cause a material outflow of assets from the Fund or Investment Manager

Charges for this Fund

The charges you pay are used to pay the operating costs of the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.
